Storm Events Database

Event Details:

Event	**Tornado**
-- Scale	**F1**
-- Length	**.3 Miles**
-- Width	**25 Yards**
State	**COLORADO**
County/Area	**MONTROSE**
WFO	**GJT**
Report Source	**GENERAL PUBLIC**
NCEI Data Source	**PDS**
Begin Date	**2005-05-06 17:00 MST**
Begin Location	**2N OLATHE**
Begin Lat/Lon	**38.63333/-107.98333**
End Date	**2005-05-06 17:02 MST**
End Location	**2N OLATHE**
End Lat/Lon	**38.63333/-107.98333**
Deaths Direct/Indirect	**0/0** (fatality details below, when available...)
Injuries Direct/Indirect	**1/0**
Property Damage	**20K**
Crop Damage	
Event Narrative	**A small tornado traveled across adjacent farms along Highway 50 in Montrose County, leaving a narrow damage path 50 to 75 yards wide. A three-sided wood-framed tin-roofed barn, approximately 35' x 12' was lifted up, flipped and carried 20 feet to the W-NW landing on its roof and crushing a large chicken coop. A small chicken coop on the south side of the barn was blown approximately 50-70 feet to the N-NW and its roof was not found. Small limbs were broken on trees, a number of shingles were torn from roofs and impaled on objects, and a trampoline and sheets of tin were lifted and blown up to 75 yards into a field. One of the residents was hit in the leg by a flying chair, and a horse was injured in the leg by flying debris. Residents at one of the farms said they heard a loud "wind" noise and saw a great deal of debris swirling around and a lot of dust obscuring their vision. Reports indicate a number of funnel cloud sightings in the area around the time of the storm damage.**

Event Map:

Note: The tornado track is approximate based on the beginning (B) and ending (E) locations. The actual tornado path may differ from a straight line.
